Soft skills	unit testing, agile development, data modeling, web accessibility, usability design, drawing and computer graphics, business strategy

Experience

Datto Inc. January 2015 - Present

Associate Software Engineer Rochester, NY

Improved and maintained the on-board code for backup and business continuity appliances, as part of an agile scrum team. Refactored and unit tested legacy code, improving readability and security. Implemented and tested several new features on a tight schedule, and completed them in time for the annual conference. Identified usability issues, and worked with the product owner to find solutions.

The Vanguard Group (Randstad US contractor) June – December 2013

UI Intern Philadelphia, PA

Developed and tested Java Server Facelets web applications as part of an agile development team. Converted visualizations of customers' accounts to Angular JS, and added unit tests to improve maintainability. Documented the team's development process to help new team members acclimate and start contributing faster.

Penn State University – Teaching and Learning with Technology June – August 2012

Web Accessibility Intern State College, PA

Investigated and documented websites' accessibility issues. Developed accessibility patches for WordPress and Drupal themes and plugins using PHP, JavaScript and jQuery to improve user experience for people with disabilities.

Education

Rochester Institute of Technology September 2010 – December 2014

Information Technology major, Web Application Development and Database concentrations
GPA: 3.96, summa cum laude

University of Technology, Sydney, Australia (study abroad) February – June 2014
